

Flood Insurance Information Sheet for Louisiana

The National Flood Insurance Program (NFIP) is essential to completing half a million property sales each year¹, but it must be reauthorized by September 30, 2019 to continue providing flood insurance. REALTORS[®] support H.R. 3167 and urge Congress to find a way forward on a long-term NFIP reauthorization.

Properties at Risk

Every property in the state has some flood risk; wherever it rains, it can flood, yet not all at-risk are insured.

2,061,582	Total housing units, 2017
337,611	Housing units in the state within a 500-year floodplain, 2015 ²
500,658	Number of NFIP policies in force as of April 30, 2019 ³
24%	Percent of housing units with an NFIP policy

Flood Insurance Benefits to Policyholders

For many, owning a property is the biggest source of wealth. The NFIP offers substantially more rebuilding assistance than FEMA's Individuals and Households Program (IHP) for uninsured properties.

\$167,040	Median home value, 2019 Q1 ⁴
\$70,817	Average NFIP dollar amount paid on residential claims for properties in the state, 1996–2016 ⁵
227,167	Number of NFIP paid claims ⁵
\$9,881	Average IHP disaster payment to those without flood insurance in the state, 2006–2016 ⁶
74,656	Number of IHP disaster payments ⁶

98% of U.S. counties have experienced at least one major flood disaster declaration.⁷ Without flood insurance, property owners must turn to the federal government for rebuilding assistance. The total cost to taxpayers of uninsured property damage is \$3.4 billion each year.⁸
