

RPR Dashboard Registration

The RPR Dashboard

gives Associations and MLSs a portal into the metrics, statistics and reports Associations require. Complete with RPR user metrics, data updates, communication content, training, as well as reports to complement housing statistics already provided by NAR, the RPR Dashboard is available to each REALTOR® Association across the country. With access granted to Association Executives, designated staff and volunteer leadership, the RPR Dashboard offers customized, branded, monthly reports, as well as market analytics derived from RPR's business intelligence data cube.

Federal and Local Economic Area Reports can be used by Association staff as well as REALTOR® volunteers, such as NAR's Federal Political Coordinators (FPC's), or local association officers. Customizable with an Association logo, these reports complement housing statistics already provided by NAR. Leveraging the foundation of RPR's Commercial application, these reports focus on the consumer tapestry data, demographic and lifestyle information, as well as economic

trending. The Reports can be generated by congressional district boundaries, or for an entire state, and are great to use for in-district meetings with congressional representatives or U.S. Senator. Reports can also be generated for state legislative districts, a county, city, ZIP or even a customized area.

RPR Dashboard Registration Instructions

To access the RPR Dashboard, the registration form below must to be completed and returned to RPR staff who are available at the RPR table. The form can be completed either by the Association CEO or AE, or their designee. Only one registration is needed for each Association. All fields are required. You will receive an email confirmation that your form has been received and requesting an association logo to be uploaded and returned, so your Dashboard reports can be branded. In 7-10 days you will be notified when the Dashboard for your Association is ready and the user accounts for you and your staff have been set up. To learn more about the RPR Dashboard, go to our blog.narrpr.com/association/association-dashboard.
